

What is Alleygating?

Alleygating is a method of controlling access to the rear alleys of homes, for residents, service personnel and other authorised people. This is achieved by the installation of lockable gates placed at strategic locations within the alleyways.

Why Alleygating?

Up to 80% of burglaries occur via the rear of a property. The Alleygates have the potential to impact on almost all aspects of crime and other forms of anti-social behaviour, such as alcohol and drug abuse, prostitution, arson, flytipping and littering. The Alleygates also cut off the thieves 'rat run' which restricts their ability to commit street crimes. Alleygating can substantially improve the quality of life of residents, and in doing so enhance community spirit.

The Expanded Metal Company Alleygator™ gained Secured by Design in 2006 following rigorous testing by the Loss Prevention Certification Board. Alleygator™ was certified to LPS 1175: Issue 5 June 2000 - Specification for testing and classifying the burglary resistance of building components, strong points and security enclosures.

Step by Step Advice

The Expanded Metal Company has a wealth of experience advising on the suitability of gating and can assist from concept to completion. We can offer advice on:

- Suitability
- Consultation/presentations with residents
- Key management systems
- Ownership and legal requirements
- Planning/closures/adopted highways
- Sustainability

Alleygator™

The Expanded Metal Company Alleygator™ is a specially designed gate incorporating expanded metal mesh infill, supplied for vehicular or pedestrian access. The key system ensures that no two alleyways can be accessed with the same key and the unique design means they cannot be easily copied. Master keys can be issued to local authorities for emergency or maintenance access.

Benefits

You will experience less:

- Burglary and theft
- Litter and flytipping
- Hassle, misuse and FEAR

You will experience more:

- Private space
- Control
- Road safety

Leading to:

- A cleaner, safer environment
- Improved community spirit
- Reduced waste management costs for local authorities

Available in a range of colours...

Services we provide

- Presentations
- Help and guidance
- Visits
- Surveys
- Literature

The Expanded Metal Company have a policy of continuous product development and therefore details and specifications shown are subject to change.

Features

- Durable steel mesh infill has good anti-climb and anti-cut properties
- Excellent through vision
- The gate has a self locking deadlock making it less likely to be left open
- Interchangeable panels are easier and more cost effective to replace in the event of accidental damage
- Posts are installed into the ground and do not impose onto walls, reducing noise and vibration
- Available with a range of toppings
- Available in a range of colours
- Special designed mesh for improved aesthetics

We are also able to supply other types of gates such as vertical bar and perforated - details are available upon request
