
S&B STEELHOARD®

(Patent Number: 2300435)

'The most desirable hoarding system in the WORLD!'

STEELHOARD® a fully re-usable continuous site enclosure system:

The benefits are endless:

- Cost Effective: *totally re-useable unlike traditional timber systems*
 - Heavy Duty: *heaviest gauge sheeting and components gives maximum security and guaranteed site longevity*
 - Boosts Corporate Image: *the most prestigious and attractive system due to its clean continuous boxed profile elevations and polyester coated finish*
 - Minimal Storage: *components easily stack, store and transport*
 - Safe in Situ: *fully wind tested system gives peace of mind*
 - Safe in Use: *all components fall within current manual handling legislation*
 - Flexibility: *a wide range of ancillaries covers all scenarios*
 - Highly Competitive: *available for sale, hire and contract hire*
-

COMPOSITE DESIGN

The radical design of STEELHOARD® incorporates several unique features to ensure installation is fast and straightforward.

The system is fabricated on site from heavy duty sheets, channels and posts, which rapidly assemble into a robust, durable hoarding.

INSTALLATION

Driven ground spikes or spigots are concreted into the ground along the desired hoarding line.

Galvanised posts and channels are then erected to form a framework into which heavy duty box profiled sheets are laid between the top and bottom channels resulting in a clean continuous series of cladded elevations.

Its unique design allows very fast installation and dismantling times provided a private, secure enclosure without the need for follow on trades.

VERSITILITY

The systems' flexible design and full range of ancillaries, ensures that STEELHOARD® can fulfil virtually all site your scenarios.

Accessories include heavy duty gates, personnel doors, barbed wire extensions and free standing kentledge kits where ground penetration is not permitted, such as runaways & shopping malls.

COST EFFECTIVE

STEELHOARD® cost effectiveness is a result of the systems high re-use factor, offering contractors the ability to relocate hoarding onto subsequent contracts, as they do with site cabins and storage units.

The heavy duty 0.85mm thick box profile sheets provide a natural overlap, negating the need for expensive joint fixings.

Maintenance is also kept to a minimum as the tough polyester coating can simply be periodically washed down to retain the clients image, in addition, the corrugated profile deters both bill posting and graffiti because of its non flat surface.

SUPPLY AND DISTRIBUTION

STEELHOARD® can be supplied worldwide on a sale or hire basis offering a complete installation, dismantle and relocation service.

The composite system ensures that all components fall within the EEC lifting regulations and storage space is minimal e.g. up to 500 linear metres of STEELHOARD® is transportable in just one load!

PRICE

Guideline Sale Price List 2007 for Materials:

- | | | |
|----|----------------------------------|------------------------------|
| 1. | Base Price of Steelhoard® System | £ 60.00 per metre |
| 2. | Lockable Pedestrian Gate | £400.00 each |
| 3. | Double Leaf Vehicle Access Gate | £700.00 each |
| 4. | Powder Coating Sheets (one side) | £ 10.00 per metre |
| 5. | Powder Coating Channels | £ 3.00 per metre per channel |
| 6. | Powder Coating Joint Channels | £ 2.00 each |

Guideline Price List 2007 for Labour:

- | | | |
|----|--|-------------------|
| 1. | Installation in Soft Ground | £ 15.00 per metre |
| 2. | Installation in Hard Ground | £ 18.00 per metre |
| 3. | Installation of Double Leaf Vehicle Gate | £136.00 each |
| 4. | Dismantle of Steelhoard® | £ 6.25 per metre |

Note: guideline storage charges are available upon request

Guideline Contract Hire Price List 2007 for Materials:

- | | | |
|----|---------------|-------------------|
| 1. | Up to 1 year | £ 40.00 per metre |
| 2. | 1 – 2 ½ years | £ 50.00 per metre |
| 3. | 2 ½ - 5 years | £ 60.00 per metre |

Note: contract hire is based on our standard galvanised system and powder coating and labour costs are additional as listed above.

A TRULY SUPERB SYSTEM...just ask our customers!

Subject: Barkerend

- Jem
- Just a quick email to pass onto yourself and your erectors comments received about the recently installed hoarding at Barkerend.
- The new solid steel hoarding erected on the New Otley Road side of the site has received quite a few comments from passers by, namely a director of a local curtain walling company and my senior safety rep who lives in Bradford, to name but a few.
- They have all stated how neat and tidy it looks, and that it is the best construction site hoarding they have seen, even better than some permanent fences that are sometimes built around completed projects.
- Having opted for brand new panels down that side of the site, which is the main public frontage from Carillions' perspective, it is a credit to both of our companies to see the finished product which goes a long way to portraying to the general public a professional site.
- Please pass this onto anyone concerned.
- Regards
- Ian

- Subject: Asda Llangefni

- Hi Jem
- I would like to inform you how happy I am with the job you guys have done here in Llangefni it looks both well presented and very professional. Our client Asda have also passed comment on it along with the local residents. Could you please visit Pwllheli to look at my other site down there too.
- Can I also say the both the service and the manner in which yourself and the fitters have performed is to be commended.
- Thank you again for all your assistance
