

Span 400 Stairway

ACCESS TOWER SYSTEM

INSTANT

QUALITY & STRENGTH YOU CAN TRUST

Key Features

1. Rib-Grip – cold formed joints

The cold-formed Rib-Grip jointing process is a key feature of the Instant tower system and provides three times the strength and durability of traditional welded joints. 10 year no question warranty!

2. Span 400 Frame – reversible multi-purpose frames

High-strength lightweight alloy construction makes components easier to handle. The Span 400 frame is fully interchangeable with all existing parts and means fewer components to stock and control.

3. Adjustable Leg

A choice of 400mm, 600mm & 800mm height adjustment is provided by Quick-Adjust legs. This provides quick and easy levelling on rough or uneven surfaces. Once loaded they cannot be accidentally released.

4. Automatic locking Brace Hooks & Heavy 'Rhino-nose'

Hooks snap into locked position without prior 'priming' and an easy-release catch design aids disassembly. The large contact area (over 225") gives a firm grip. The Rhino-nose is very durable for arduous site conditions resisting damage if dropped.

5. Fluted frame rungs

Provides better grip and increased slip resistance when climbing frames during assembly or once erected.

The NEW Span 400 Stairway tower provides stairway access at 2m intervals. Constructed of lightweight aluminium, it is quick and easy to assemble and has a rung spacing of 400mm.

Stairway steps are 145mm deep, with a clear width of 400mm. The step rise is 229mm and the angle of inclination is 51 degrees. At the top level platform, an additional inside guardrail is fitted to guard the stairwell. Span 400 features the unique high strength Rib-Grip jointing system, guaranteed for 10 years.

All standard components have an extended 3 year warranty.

Compliant with EN1004 and Work at Height Directives. Load Class 3.
