Spray Equipment Operator Training

APPROVED

GRACO

CED

APPROVED

GRACO

INDUSTRIAL

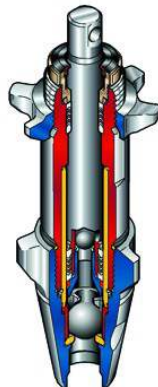

spraytrain.com is a specialist training provider for the spray equipment operator. Courses are available to cover a wide range of industries and applications, in either "off the shelf" format or tailor made courses to suit customer needs. Training your sprayers provides many benefits for you and your business.

The training courses are part theory and part

hands on practical. The theory is presented in an easy to understand format using a multimedia projector. Full reference notes are provided on completion of the course avoiding the need to take notes. Courses are interactive and questions are encouraged during the course. The training explains the reasoning behind the procedures.

This provides a sound foundation to understanding all information provided on the day. Tests involve mainly multiple choice "tick boxes" and only cover information presented on the day. The tests monitor course tutor performance and assess participant understanding.
