

RIDGEWAY

Best value and innovation in construction since 1969

- Linking system design creates secure joints even on uneven ground - over kerbs, up slopes, across rough terrain
- Unlocked or locked mode configurations prevents unauthorised dismanteling
- Complies with BS 7818 Specification for pedestrian restraint systems making it ideal for event management and pedestrian control usage
- Advertising signage and reflective can be fixed to front and back
- Also suited to construction applications around temporary excuvations and road works
- Can be used with link boards to extend barrier configurations
- Can accept warning signs and contractor information boards
- Blow Moulded 1 piece barrier constructed from tough high density polythene
- Available in 2m length
- Weighs 10Kg
- Designed for secure stacking and easy transportation
- Personalisation service available on request
