

# TRAD SAFETY DECK

## BUILDING ON ESTABLISHED SAFETY

TRAD Safety Decking is an innovative, market leading fall prevention solution for traditional build projects, predominantly house building. The system vastly improves safety compared to traditional methods such as airbags, and is significantly quicker to erect and dismantle compared to a bird cage scaffold.

### FEATURES & BENEFITS

- High Quality Fall Prevention Working Platform
- Load Capacity of 2kn per m2
- Various platform heights up to 3 metres available
- Can be installed by 1 person and comfortably erect 60m2 per hour
- Three main components
- Various panel sizes available
- Improves your productivity
- Installation service available
- Hire or Sale product
- Full competence training available for installers
- Compliance: Testing independently carried out by Loughborough University
- Roof non fragility test in accordance with ACR (M) 001:2000
- BS EN 12811-1 Part 3 for structural integrity and safety factor for use as a General Purpose Working and Safety Platform.

### 3 PANEL SIZES

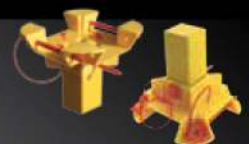

**SIZES:** 1.0x1.0m / 1.0x0.75m / 1.0x0.5m  
**WEIGHT:** 11.5 kg  
**CODE:** 080305 / 080310 / 080315

### COMPOSITE LEG

**HEIGHT:** 3 m  
**WEIGHT:** 4.3 kg  
**CODES:** 080168 / 080162 / 080160

### UNIVERSAL HEAD/FOOT

**WEIGHT:** 0.5 kg  
**CODE:** 080200
