

If **YOU** specify, distribute, purchase, fabricate
or **install steel gratings,**
YOU have a responsibility to provide **compliant products**
to the **latest specification.**

20**20mm Ball Proof Grating****Specification to: BS4592-0:2006+A1:2012**

To be used where the working platform or walkway is above a place where people are working (as opposed to people passing under it occasionally). The maximum openings shall not permit the passage of a 20mm diameter sphere. Typically used on walkways above machinery and permanent working areas, where the risk to personnel from large objects, falling from above, is critical.

35**35mm Ball Proof Grating****Specification to: BS4592-0:2006+A1:2012**

To be used where the working platform or walkway is above a place where people pass through occasionally, the maximum openings shall not permit the passage of a 35mm diameter sphere. Typically used on maintenance access, industrial plants, un-manned substation modules, data centres, where site access is limited and occasional.

U**Utility Grating****Specification to: BS4592-0:2006+A1:2012**

To be used where there is no risk of personnel passing below the working platform or walkway. Typically used on ground level shallow trenches, above water channels in treatment works or placed on solid floors to elevate walking areas from contaminants.
